I would like to take this opportunity to voice my opinion on the issue of "locally oriented" material heard on XM radio. I am very pleased with the offerings that XM is providing, including traffic and weather. It's a service that I have found very helpful during my daily routine, as I travel and now have instant access to the most current information available. I would like to recommend that the NAB's petition 04-160 be rejected based on the 1st amendment to the Constitution.  
Respectfully,

Kenneth R. Downs  
XM listener
